Best Suitable for Budget Homes,
Farm House, Resorts, Vacation
Homes, Cottage Homes etc.

Advantages and main features of these houses.

- Fast construction methods - cost-effective houses -
- Safe to live in - comfortable, modern and effective designs -
- Easy to modify and change - great space management - materials made with resale value
- Low maintenance cost - eco & climate-friendly houses - energy saving - value for money.

About us

We design and build houses and buildings using materials suitable to the climate conditions of Kerala using modern rapid construction methods and technologies.

With a life span of more than 50 years, these homes are cost-effective, eco-friendly and modern durable homes. Our homes have the guarantee of longevity and our promise of a hassle-free living environment.

The main points of this method of construction.

- ◆ ₹300 to ₹3000 per square feet as per customer requirement.
- ◆ Project duration 1 to 4 months.
- ◆ Easy Second Floor extension for Single Floor concrete buildings.

These houses are a popular choice in various regions such as Europe, America, Canada, Australia, New Zealand etc. For more information and details, Please call us or go through our website.
